PROFESSIONAL SUMMARY

Senior Business Analyst and POS Systems Specialist with 18+ years building and supporting enterprise retail technology environments. Owns POS change control and business-rule governance across **400+ registers** and **200+ SQL servers** running **Oracle Xstore / Xcenter / Xoffice**, and architect of **POS Plus Platform** — a suite of 30+ custom in-store applications running 24/7 across all stores. Hands-on across SQL Server, .NET / ASP.NET application development, ERP integrations (Oracle Retek Resa, SIM), BI / SSRS reporting, and digital signage. Strong in AI-assisted development — using Claude, GitHub Copilot, ChatGPT, Gemini, and Ollama (local models) to accelerate engineering, automate documentation, and modernize legacy workflows.

TECHNICAL SKILLS

- **POS Platforms:** Oracle Xstore, Xcenter, Xoffice
- **ERP / Retail Systems:** Oracle Retek Resa, SIM, ERP transformation servers
- **Databases & BI:** SQL Server (T-SQL, schema design, stored procedures, performance tuning), SSRS, custom dashboards, KPI / exception reporting
- **Development:** .NET (C# / VB.NET, ASP.NET, WinForms), PowerShell, Batch / VBScript, React, JavaScript
- **Payment & Compliance:** Verifone pinpads, EMV / contactless, PCI, Zebra scanners, tablet POS
- **Digital Signage:** Samsung MagicInfo, BrightSign
- **AI-Assisted Development:** Claude, GitHub Copilot, ChatGPT, Gemini, Ollama (local models)
- **E-commerce & Creative Tools:** Shopify (Horizon themes), Printify, Adobe Photoshop & Illustrator, Canva, Leonardo.ai
- **Systems / Remote Admin:** Intel AMT, PsExec, WMI, WinRM, Group Policy

PROFESSIONAL EXPERIENCE

Senior Business Analyst / POS Systems Lead

Duty Free Americas — Hollywood, FL

Feb 2008 – Present

- Architected and maintain **POS Plus Platform** — a suite of **30+ custom in-store applications running 24/7** across all retail locations — extending Xstore functionality and automating store operations.
- Own POS change control and business rules across **400+ registers** and **200+ SQL servers**, including a business-rule database of **~5,000 rules** covering promotions, discounts, tenders, and store behaviors.
- Implemented and maintain **Oracle Xstore POS, Xcenter, and Xoffice** across multiple retail locations, integrating with ERP systems for accurate end-to-end data flow.
- Designed and maintain **SQL Server databases** — table design, schema optimization, stored procedures, and data-integrity controls — and rolled out **200+ store servers with custom views** supporting POS operations.
- Built custom **ASP.NET applications, internal web tools, and automation scripts** that integrate with Xstore / Xoffice and streamline store operations. Examples include: a **full employee management system** with Xstore / Xoffice integration, an **A/R customer management and KYC system** for Xstore, and a **store attribute integration application** managing per-store configuration including taxes and receipt header/footer customization — all producing formatted flat-file outputs for store deployment.
- Developed **BI dashboards and SSRS reports** providing real-time visibility into sales, exceptions, KPIs, and system health.
- Maintain and optimize **ERP transformation servers**, correcting transaction issues and ensuring accurate data flow between POS and Oracle Retek Resa / SIM.

- Use **AI-assisted development** (Claude, Copilot, ChatGPT, Gemini, Ollama) to accelerate code generation, automate technical documentation, and shorten time-to-resolution on complex incidents.
- Manage **digital signage** content using Samsung MagicInfo and BrightSign to keep store-level media accurate and on-brand.
- Delivered enterprise initiatives including **PCI compliance, EMV and contactless certifications, Dynamic Currency Conversion, loyalty integration, first-generation tablet POS, and customer self-checkout rollouts.**
- Integrated and maintain in-store payment and scanning hardware including **Verifone pinpads** (with MX downloader) and Zebra scanners.
- Test, validate, and roll out new POS features in coordination with development, QA, and store operations.
- Primary **Tier 2 escalation point** for complex POS, network, and database incidents — performs advanced troubleshooting and root-cause analysis on issues support cannot resolve. Authors SOPs, technical documentation, and training materials for IT staff and store users.

Founder & Operator *(Side Venture)*

Independent E-commerce Business

2023 – Present

- Operate an independent **Shopify storefront** with **Printify** integration for end-to-end print-on-demand product fulfillment — including theme customization (Horizon), product catalog management, and order operations.
- Built **custom internal tools** to streamline content operations: a Metricool-compatible CSV export tool for multi-platform video scheduling, a brand-voice-driven social post generator covering five platforms, and a Shopify-aware post generator that pulls product data into platform-native posts.
- Manage multi-platform **social media operations** (Facebook, Instagram, TikTok, YouTube, Pinterest) using Metricool, Postiz, and Post Studio.
- Produce graphics, product art, and promotional content using **Adobe Photoshop and Illustrator, Canva,** and **Leonardo.ai** for AI image generation.
