

HIRAM SANCHEZ

Senior Business Analyst | Retail POS Systems | Internal Application Developer
Hialeah, FL • (786) 367-4135 • hiram.sanchez.it@gmail.com • [linkedin.com/in/hiram-sanchez](https://www.linkedin.com/in/hiram-sanchez)

PROFESSIONAL SUMMARY

Senior Business Analyst and POS systems specialist with **18+ years** in enterprise retail technology across **Oracle Xstore** and **SAP POS** environments: store hardware, POS pricing engines, Oracle and SQL Server databases, Xcenter replication, file-based integrations, digital signage, and internal web applications. Owns POS change control across **400+ registers and 200+ SQL servers**, architect of **POS Plus Platform** (30+ in-store apps running 24/7) and **Xstore Hub**, the portal that unifies DFA's Xstore web apps and monitors their scheduled jobs. Designs pricing Xstore doesn't support natively (wholesale, KYC tiers, loyalty, coupons), proves it in the lab, and builds the tools with a spec-driven Claude Code workflow on ASP.NET and .NET 10.

TECHNICAL SKILLS

- **POS Platforms:** Oracle Xstore, Xcenter, Xoffice (incl. Xcenter replication, RTLog broadcaster); SAP POS 2.3; GK Software POS
- **Xstore Internals:** Deal pricing engine (prc_deal, customer-group triggers, transaction-wide deals), manual discounts (DSC_*), hierarchical item pricing and Best Deal resolution, serialized coupons, customer affiliations, MNT / DataLoader files
- **ERP / Retail Systems:** Oracle Retail ReSA, SIM, RTLog, ERP transformation servers
- **Databases & BI:** Oracle 19c (SQL*Plus, SQL Developer), SQL Server (T-SQL, schema design, stored procedures, tuning), SSRS, KPI / exception reporting
- **Development:** ASP.NET, .NET 8 → .NET 10, VB.NET / C#, IIS hosting and host-name bindings, console publisher services, role-gated web apps, React, JavaScript
- **Scripting & Automation:** Batch / cmd (incl. PowerShell-restricted environments), PowerShell with DPAPI credentials, Windows Scheduled Tasks
- **Log Analysis:** xstore.log, repl.log, replicationAudit.log, ejournal, PosLog.xml, EFTLink and wrapper logs
- **AI-Assisted Development:** Claude Code in Visual Studio (spec-driven via PLAN.md / CLAUDE.md), Claude, GitHub Copilot, ChatGPT, Gemini, Ollama
- **Payment & Compliance:** Verifone pinpads, EMV / contactless, PCI, Zebra scanners, tablet POS
- **Systems / Remote Admin:** Intel AMT, PsExec, UltraVNC, WMI, WinRM, Group Policy, LAPS
- **Digital Signage:** Samsung MagicInfo, BrightSign (content scheduling and media deployment to store displays)
- **E-commerce & Creative:** Magento (API integration), Shopify (Horizon themes), Printify, Adobe Photoshop & Illustrator, Canva, Leonardo.ai

PROFESSIONAL EXPERIENCE

Senior Business Analyst / POS Systems Lead

Duty Free Americas — Hollywood, FL

Feb 2008 – Present

- Architected and maintain **POS Plus Platform**, a suite of **30+ custom in-store applications running 24/7** across all retail locations, extending Xstore functionality and automating store operations.
- Built and run **Xstore Hub**, an IIS-hosted portal that unifies DFA's internal Xstore applications and **monitors every scheduled console job** behind them. Delivered apps include Employee Management, Store Info Management, Xstore Flight Exception, KYC Tier Portal, **Discount Manager**, **Simple Promo App** (approval workflow with automatic MNT publishing), **PromoChecker** (pre-flight validation of DataLoader promo files), **Coupon App** (serialized, QR-redeemable coupons), and Support Desk Rota.
- Own POS change control and business rules across **400+ registers and 200+ SQL servers**, including a business-rule database of **~5,000 rules** covering promotions, discounts, tenders, and store behaviors.
- Delivered DFA-specific pricing inside Xstore's engines where no native feature exists: **wholesale pricing** (hierarchical item pricing, customer-group deal triggers, manual discounts), **four KYC customer pricing tiers** driven by MNT group assignments, and an **automatic transaction-wide loyalty deal** across five loyalty tiers.

- Implemented and maintain **Oracle Xstore, Xcenter, and Xoffice**, integrated with Oracle Retail ReSA and SIM; correct transaction issues on ERP transformation servers to keep POS-to-ERP data flow accurate.
- Served as lead configurator for **SAP POS 2.3** across multiple retail divisions, managing builds, testing, gold images, and store upgrades; also trained and certified on **GK Software** POS.
- Work in **Oracle 19c** (SQL*Plus, SQL Developer) for lab schema research and scripted changes, and maintain **SQL Server** schemas across 200+ store servers with custom views and application back ends.
- Built ASP.NET applications for employee management, **A/R customer management with KYC**, and store attributes (taxes, receipt header/footer), each producing formatted flat files for store deployment.
- Keep data moving between stores and central systems with scheduled tasks and **MNT / DataLoader** files, and built an **automated inventory movement system** that collects store inventory files every five minutes, stages them centrally with store and timestamp identification, and keeps daily audit logs, engineered in native batch to meet a locked-down security policy.
- Primary **Tier 2 escalation point** for complex POS, network, and database incidents; perform **root-cause analysis** across Xstore application, replication, and payment logs to isolate store-side versus central-system failures and route remediation to the right team. Author SOPs, documentation, and training materials.
- Follow a **spec-driven AI workflow**: research Xstore manuals and the live schema, prove the approach in a lab database, write a PLAN.md / CLAUDE.md specification, then build with **Claude Code in Visual Studio**.
- Developed **BI dashboards and SSRS reports** giving real-time visibility into sales, exceptions, KPIs, and system health.
- Delivered **PCI compliance, EMV and contactless certifications, Dynamic Currency Conversion, loyalty integration, first-generation tablet POS, and customer self-checkout**; integrated Verifone pinpads (MX downloader) and Zebra scanners across the fleet.
- Manage the in-store **digital signage** network with **Samsung MagicInfo** and **BrightSign**, scheduling content and deploying media to store displays so promotions and branding stay accurate across locations.
- Developed a custom **Magento** administrative interface using the Magento API and VB.NET to manage the e-commerce site outside the standard admin.

Founder & Operator *(Side Venture)*

Independent E-commerce Business

2023 – Present

- Operate a **Shopify storefront** with **Printify** print-on-demand fulfillment, including Horizon theme customization, catalog management, and order operations.
- Built **custom internal tools** for content operations: a Metricool-compatible CSV export for multi-platform video scheduling, a brand-voice social post generator covering five platforms, and a Shopify-aware post generator.
- Run multi-platform **social media operations** (Facebook, Instagram, TikTok, YouTube, Pinterest) with Metricool, Postiz, and Post Studio.
- Produce graphics and product art with **Adobe Photoshop and Illustrator, Canva, and Leonardo.ai**.

EDUCATION

Associate's Degree, *Miami Dade College*

LANGUAGES

Bilingual: English • Spanish
